Product (UX/UI) Designer with Frontend Expertise

Product Designer with a frontend background focused on creating scalable digital products, UX systems, and design-driven user experiences. Experienced in product thinking, information architecture, interaction design, responsive interfaces, and design systems. Combining UX/UI design expertise with hands-on implementation knowledge, I

bridge the gap between design and development to create intuitive, accessible, and technically feasible solutions.

Professional skills

UX / Product Design — UX Research, Market and Competitor Analysis, User Flows, Customer Journey Mapping, Information Architecture, User Scenarios, Wireframing, Interaction Design, Usability Testing, Rapid Prototyping, Product Thinking, Feature Prioritization, MVP Definition, Design Systems, Responsive UX, User-Centered Design, Data-Informed Iteration, Cross-Functional Collaboration e

UI Design — Figma, Visual Design, Auto Layout, Components and Variants, Responsive and Mobile-First Interfaces, Visual Hierarchy, Typography, Color Systems, Layout and Composition, UI Components, Component Libraries, Design Systems, Design Tokens, UI Kits, Interaction States, Interactive Prototyping, Accessibility, UI Consistency, Style Guidelines, Developer Handoff

Frontend — HTML5, CSS3, JavaScript, responsive implementation, component-based architecture, React-oriented UI architecture, Tailwind CSS etc.

Tools — Figma, Miro, Jira, Confluence, Photoshop, Claude AI, and Front-End Development Tools etc.

Professional Experience

«Wayside Publishing» (August 2023 - December 2025)

https://www.waysidepublishing.com/

UI Developer / UI Designer /I worked on a large educational web platform, developing and maintaining responsive interfaces and reusable UI components. I contributed to the design system, including component rules, spacing, typography and tokens, created reusable templates to keep the interface consistent across 200+ pages, redesigned educational content layouts, fixed UI-related issues, and collaborated with product designers, UX, QA and frontend engineers. I also participated in information architecture and UX flow discussions in Miro.
Role: UI Developer / UI Designer Worked on responsive educational platform interfaces and reusable design system components for a large-scale online learning platform.

Key responsibilities:

- Developed and maintained responsive web application interfaces;
- Refactored content and fixed UI-related issues;
- Designed and redesigned educational content layouts and interface elements;
- Created reusable responsive UI components and templates;
- Maintained visual and style consistency across the platform;
- Contributed to the development and maintenance of the design system;
- Worked with HTML, CSS, CSS variables etc;
- Participated in information architecture and UX flow discussions using Miro.

«Oxagile» (July 2021 - January 2023)

https://www.oxagile.com/

TrustSpot Project https://www.trustradius.com/products/trustspot/reviews

I worked on TrustSpot, a review and reputation-management platform that enabled businesses to collect verified customer reviews and integrate them into their own websites and online stores through widgets and badges. My responsibilities combined UI/UX design and frontend implementation: I worked on responsive web application interfaces, landing pages, navigation and page structure, reusable UI components, and visual assets for digital and marketing purposes. I created web page designs in Figma, worked with the company's existing style guide, and also handled internal design tasks, including banners and other supporting visual materials.

On the frontend side, I implemented and maintained interfaces using HTML, CSS, Less, JavaScript, SVG and Webpack, refactored existing functionality and fixed UI issues. I also supported Shopify stores used by TrustSpot customers, diagnosing and resolving layout, styling and responsive issues connected with the integration of TrustSpot functionality into client storefronts.

Project Role: UI/UX designer, frontend developer

«TutorOnline» (January 2021 – September 2021)

https://www.tutoronline.net/

I worked on a web application for tutors and students that included both a public-facing website and a back-office system.

My responsibilities included HTML/CSS implementation, styling and creating React components, and working with SCSS/Less. Alongside frontend development, I participated in defining the information architecture and creating user flows for the web application in Miro.

I also worked on landing pages and interface implementation for the product, collaborating within a small development team.

«BelBitAliance» (June-2017 – August 2020)

I worked on two different web application projects.

Fintech Back-Office Platform

I worked on the frontend of a legacy back-office web application used for operational and financial workflows. The system supported customer activity tracking, client account and financial data management, order-management processes, hierarchical company structures and reporting. My responsibilities included interface implementation, refactoring existing functionality and fixing UI issues. I worked mainly with HTML, CSS, JavaScript, Bootstrap and jQuery within an existing legacy application.

Pet Services Platform

I also worked on a web application connecting pet owners with veterinarians and other pet-care specialists. The product included a public-facing website and a back-office system. I implemented responsive web interfaces and participated in functionality refactoring and bug fixing using HTML, CSS, JavaScript, jQuery and Bootstrap.

Project Role: html-coder/junior frontend-developer

Languages

Belorussian/Russian — native

English — Upper Intermediate (B2)

German — Elementary (A2)

Education

M.Sc. in Biological Sciences - Belarusian State University, Faculty of Biology(department of microbiology).

Training course from Yan Ageenko school of design “Quick start in web design”, “UX/UI and web design”.

Training course from the Educational center of Park of high technologies**: “**Program Front-end Developer and Program IT Practice Lab**”**.

Belarusian State Academy of Arts. Center "Creative Workshops," Practical Photography.

Additional Experience

In addition to my experience in UI/UX design and frontend development, I have an early technical background working with laboratory equipment in scientific, biotechnological, immunological laboratories and pharmaceutical manufacturing environments. This gives me a practical understanding of scientific and industrial workflows, allowing me to communicate effectively with technical teams and design intuitive interfaces for complex products.
