Product (UX/UI) Designer with Frontend Expertise

Product Designer with a frontend background focused on creating scalable digital products, UX systems, and design-driven user experiences. Experienced in product thinking, information architecture, interaction design, responsive interfaces, and design systems. Combining UX/UI design expertise with hands-on implementation knowledge, I bridge the gap between design and development to create intuitive, accessible, and technically feasible solutions.

Education

Training course from Yan Ageenko school of design “Quick start in web design”, “UX/UI and web design”.

Training course from the Educational center of Park of high technologies: “Program Front-end Developer and Program IT Practice Lab”.

Belarusian State Academy of Arts. Center "Creative Workshops," Practical Photography.

M.Sc. in Biological Sciences - Belarusian State University, Faculty of Biology(department of microbiology).

Professional skills

UX / Product — UX flows, IA, design systems, interaction design, responsive UI, product thinking

UI Design — visual design, responsive UI, component libraries, design systems, design tokens, accessibility, mobile-first interfaces, prototyping

Frontend — HTML5, CSS3, JavaScript, responsive implementation, component-based architecture, React-oriented UI architecture, Tailwind CSS

Tools — Figma, Miro, Jira, Confluence, Photoshop, Claude AI

Languages

Russian/Belorussian — native

English — Upper Intermediate (B2)

German — Elementary (A2)

Professional Experience

«Wayside Publishing» (August 2023 - December 2025)

<https://www.waysidepublishing.com/>

Role: UI Developer / UI Designer / Design System Designer

Worked on responsive educational platform interfaces and reusable design system components for a large-scale online learning platform.

Key responsibilities:

- Developed and maintained responsive web application interfaces;
- Refactored content and fixed UI-related issues;
- Designed and redesigned educational content layouts and interface elements;
- Created reusable responsive UI components and templates;
- Maintained visual and style consistency across the platform;

- Contributed to the development and maintenance of the design system;
- Worked with HTML, CSS, CSS variables etc;
- Participated in information architecture and UX flow discussions using Miro.

«Oxagile» (July 2021 - January 2023)

<https://www.oxagile.com/>

TrustSpot Project <https://www.trustradius.com/products/trustspot/reviews>

Designed and developed responsive web interfaces and UX/UI solutions for a reputation-management platform with verified review systems.

Project Role: UI/UX designer, frontend developer

- worked on landing pages, responsive web application interfaces, UI/UX design, and visual assets for digital platforms and marketing materials.

«TutorOnline» (January 2021 – July 2021)

<https://www.tutoronline.net/>

Project: development of web application (site and back-office system) for tutors and students

Project Role: frontend-developer, UX designer

- worked on HTML/CSS implementation, React component styling, information architecture, and user flow design for web applications using Miro.
- Worked with HTML, CSS, SCSS/Less, and React-ready component structures;

«BelBitAliance» (June-2017 – August 2020)

Projects:

- Web application for pet owners, veterinarians, and pet service specialists.

- Fintech-oriented back-office platform with operational workflows, customer activity tracking, financial account management, reporting systems, and legacy system refactoring.

Project Role: html-coder/junior frontend-developer

- Worked on web application development and interface implementation;
- Participated in functionality refactoring and bug fixing;
- Contributed to legacy back-office system improvements.

Portfolio:

1. [DocAssistant - AI Knowledge Assistant Platform](#)

B2B SaaS Product | MVP + Selling Landing Page

 [Full Project Description Link:](#)

 [Promo Landing Page + MVP Application Link](#)

A platform that enables companies to transform documents and knowledge bases into AI-powered customer assistants and embeddable website widgets. The case study explores onboarding, knowledge management, chatbot testing, publishing workflows, conversion-focused landing pages, monetization strategy, and scalable design systems.

Focus areas:

- AI Product Design
- SaaS Platforms
- Knowledge Base UX
- Conversational Interfaces
- Design Systems
- Product Strategy
- Widget Builder Experience
- Product-Led Growth

2. [Ascendra Workspaces — Cloud Workspace Management Platform MVP](#)

 [GitHub additional link](#)

*UX/UI Design • Product Thinking • Design System • Responsive Web App*Ascendra

Workspaces is a concept for a cloud infrastructure management platform designed for both **Developers** and **DevOps Engineers**. The project focuses on simplifying virtual machine management through a clean interface, clear information hierarchy, and role-oriented workflows. Instead of treating infrastructure as a collection of isolated screens, I approached the product as a complete workspace where users can create, monitor, deploy, and manage cloud resources with minimal cognitive load.

My contribution

- Product discovery and UX strategy
- Information architecture
- User flows and interaction design
- Responsive UI for desktop and tablet
- Design system and reusable components
- Dashboard and data visualization
- Documentation and UX rationale
- Interactive React implementation

Key Features

- Virtual Machine management
- Template library
- Resource monitoring dashboards
- Fleet analytics
- Inventory management
- Role-based navigation for Developers and DevOps
- Responsive layouts
- Reusable component system

Design Goals

The primary goal was to create an interface that feels calm, predictable, and efficient even when managing complex infrastructure.

Special attention was given to:

- reducing visual noise;
- creating clear hierarchy between operational tasks;
- supporting quick decision making;
- keeping dashboards readable under different screen sizes;
- building scalable UI components suitable for future product growth.

Technical Stack

- React
- TypeScript
- Vite
- React Router
- Tailwind CSS
- Radix UI
- Recharts

Documentation

The repository includes detailed documentation describing:

- UX decisions;
- Information Architecture;
- User flows;
- Design rationale;
- Miro diagrams;
- implementation notes.

3. **Social Radar — Product Case**

Full Project Description Link:

 https://app.notion.com/p/Social-Radar-Product-Case-36c0a2e6e1d7800b902dfcbe6c2b1f76?source=copy_link

UI (Figma) only link:

UX Diagramm (Miro) only link:

 https://miro.com/app/board/uXjVGiCuPHs=/?share_link_id=569653291730

Social Radar is a proximity-based social discovery platform that helps people turn shared interests into real-world connections. By combining reciprocal filtering, low-pressure interaction mechanics and privacy-first visibility controls, the product reduces the uncertainty of meeting new people while encouraging genuine offline experiences. Instead of optimizing for endless engagement, Social Radar is designed to help users meet, connect and move beyond the app.

This case study explores:

- product architecture;
- UX systems;
- reciprocal filtering mechanics;
- dual-mode interaction design;
- design system;

4. Bio Quest — Product Case

UX Diagramm (Miro) only link:

 https://miro.com/app/board/uXjVHMdVI74=/?share_link_id=837831180391

Bio Quest is a mobile educational adventure that turns biology from memorization into exploration. Learners discover, rebuild and master living systems through challenges, visual associations and progression-based gameplay while earning ATP to unlock new worlds and experiences.

- This case study explores:
- educational product strategy;
- learning experience design (LXD);
- gamification and progression systems;
- discovery-based learning mechanics;
- scalable educational frameworks;
- platform expansion architecture;
- design system;
- mobile-first UX/UI design;

Coming Soon — Cell Culture Monitoring Workspace

B2B dashboard for laboratory workflow monitoring, data visualization, alerts and operational decision support.
